PROFILE

Full-stack Software Engineer with **6+ years** of experience building and shipping web and mobile products end-to-end — React, React Native / Expo, Svelte, Node.js / NestJS, and TypeScript. Experienced in startup environments, owning features from frontend UI to backend services, databases, media pipelines, and deployments — from startup teams to personal products live on the App Store.

EXPERIENCE

Software Engineer

2024 – Present

SermonShots / SermonLive

- Build creator-focused tools for sermon clips, live transcription, dubbing, downloads, reporting, and media workflows.
- Contribute across the full stack: Svelte / SvelteKit, NestJS / Node.js, PostgreSQL, Redis, WebSocket, RTMP / FFmpeg pipelines, and cloud deployments.
- Own product quality end-to-end — mobile testing, bug reproduction, customer issue investigation, and release validation.

Freelance Developer

2023 – 2024

Mamamia Inc.

- Delivered client-facing web features, UI improvements, bug fixes, and third-party integrations.
- Collaborated remotely with stakeholders to ship production-ready updates under tight startup timelines.

Freelance Developer

2022 – 2024

Hibuddy

- Developed marketplace-style features for hibuddy.ca — frontend flows, data handling, and user-facing improvements.
- Drove iterative fixes, performance improvements, and enhancements based on business and user needs.

Software Engineer

2021 – 2023

Skydev Solutions

- Built web applications, internal tools, and client-facing features across frontend and backend systems.
- Translated product requirements into usable interfaces and reliable application behavior with cross-functional teams.

Software Engineer

2019 – 2021

Twist Resources

- Developed web and mobile features using ReactJS, React Native / Expo, and Node.js.
- Implemented reusable UI components, API integrations, and mobile screens for client projects.
- Hands-on agile delivery, code reviews, QA cycles, and production support.

CORE SKILLS

FRONTEND

React · Svelte / SvelteKit · TypeScript · JavaScript · HTML · CSS

MOBILE

React Native · Expo · Swift · Kotlin
Flutter

BACKEND

Node.js · NestJS · Express · Go lang · WebSocket / Socket.IO

DATA & INFRA

PostgreSQL · Redis · Docker · PM2 · Nginx · GCE · AWS

MEDIA / AI

FFmpeg · RTMP · transcription · TTS · dubbing workflows

WORKFLOW

Git / GitHub · Playwright · Jemkins · customer issue debugging

SELECTED PROJECTS

MaestroScan [App Store](#)

iOS app for teachers — scan bubble answer sheets with the phone camera for instant grading, class organization, and student insights.

TalkGlot [App Store](#)

Real-time translation web & mobile product — QR guest access, speech-to-text, AI translation, chat, credit-based pricing.

Refilio [App Store](#)

iOS trip cost tracking app — expense flows, track trip habits, and monitor gas expense

SermonShots.com [Visit site](#)

AI-assisted content platform for sermon clips, dubbing, downloads, and creator workflows.

SermonLive.com [Visit site](#)

Live transcription & streaming-support platform with real-time audio, text, and media workflows.

Hibuddy.ca [Visit site](#)

Marketplace-style web product — user-facing flows and ongoing development support.

Volume.com

Web product contributions — UI implementation and product engineering tasks.
